SCHEDULE OF APPROVALS - MARCH 31, 1964

Administrative Items

Claims-Settlements

1. This claim arises out of an automobile accident which occurred on December 26, 1962 on Routes 28 and 287, Bridgewater Township, Somerset County, New Jersey, and involved a vehicle owned by Marie Griffith and operated by her husband John. As a result of this accident, street lighting equipment was damaged and subsequently repaired at a cost of $1,821.71. The New Jersey State Police investigated this occurrence and their report indicates that Mr. Griffith suffered a coronary attack while at the wheel of his vehicle which caused his car to leave the traveled portion of the roadway and strike the street lighting equipment. The insurance company representing the Griffith vehicle offered 50% in full settlement of our claim based on the fact that Mr. Griffith had no medical history of heart disease. Subsequent negotiations with the insurance company by the Claims Bureau resulted in their increasing their offer to 75% of the Highway Department claim. Giving due consideration to the circumstances under which the accident occurred, and the fact that the insurance carrier representing Mr. Griffith is willing to reimburse the Highway Department for 75% of its claim, it is my opinion that the State would be justified in accepting the above offer of settlement. It is my recommendation, therefore, in accordance with Mr. Levine's memorandum dated March 3, 1964, attached hereto, and the recommendation of Deputy Attorney General William J. McCormack, that the offer of settlement receive favorable consideration. (Mar. 30, 1964)

- - - - - - - - - - - -

2. The above captioned claim covers the cost of repairing Highway Department vehicle #HYF-284, which was damaged as a result of an accident occurring on Lamberton Street, Trenton, New Jersey on December 12, 1960 and was repaired at a cost of $53.85. The Highway Department vehicle was involved in a collision with a vehicle owned by Edward Potts, the Potts' vehicle allegedly backing into the Department vehicle. After unsuccessful attempts to secure voluntary payment, suit was instituted in order to recover the full amount of the claim. A proposed offer of settlement has been made, which offers to settle the matter by a payment of $26.93. This payment would leave outstanding a balance in the amount of $26.92. It appears that cost of preparation for trial and attendance at the trial of State personnel would involve a cost greater than $26.92, which will remain unpaid if the compromise settlement be accepted. In view of the foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum, attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that this claim against Edward Potts in the amount of $53.85 be cancelled upon the payment of $26.93 by Mr. Potts as a compromise settlement. (Mar. 30, 1964)

(April 29, 1964)

Claims-Settlements

4. This claim arises out of damage to traffic signal equipment located at Route U.S. 322 and Cologne Avenue in Hamilton Township, New Jersey. This equipment was damaged on September 2, 1961 as the result of a motor vehicle accident involving a vehicle owned and operated by James Robinson and a vehicle owned by John O'Neill and operated by Margaret Gallagher. After all attempts to collect the above mentioned claim from the involved parties proved futile, suit was instituted against them. Information received after institution of the suit has convinced the Claims Bureau that James Robinson is deceased and that the likelihood of obtaining a Judgment against Margaret Gallagher and John O'Neill is extremely unlikely. In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General William J. McCormack that permission be granted to enter into a Stipulation of Dismissal with Margaret Gallagher and John O'Neill dismissing the pending litigation and that the claim against them be cancelled rather than incur additional expense in what would probably be a futile attempt to recover the District Court proceedings. Since James Robinson is now deceased, leaving no estate, it is also recommended that the pending claim against him be cancelled, thus closing the entire file in this case. (April 29, 1964)

The vacating date of the property was August 1, 1963. Mrs. Payne moved from the above parcel on November 19, 1963, and then presented a moving claim in the amount of $75. She did not comply with all Departmental procedures and submit two estimates prior to her move. The reason was that her tenant moved leaving her alone in her house, and the thieves broke in and stole things from her. During the negotiations she became ill and was rushed to the hospital. The hospital authorities refused to release her until the church found a home for her to move into. This was due to her advanced age, since she is a widow, age 86. Mrs. Payne thought she did what was proper under the circumstances. These are extenuating circumstances, and the cost of $75 appears reasonable. Authority is requested to make payment to Mrs. Payne in the amount of $75 for her relocation costs, based on the approved estimates and executed Departmental Relocation Certification form. STATE OF NEW JERSEY
STATE HIGHWAY DEPARTMENT

SCHEDULE OF APPROVALS-JUNE 8, 1964

Administrative Items

Federal Aid - Urban Funds

1. It is recommended that the attached project agreement in duplicate be approved and executed for Right of Way; Route 17, Section 7, Route 4 to Wearimus Road, Midland Overpass, Project U-102(13). The amount of Federal Aid Urban funds obligated is $38,885.72 which is 50% of the estimated cost for Federal participation. This project agreement is being modified in accordance with the amount of Federal reimbursement due the State on the Final Voucher. (June 1, 1964)

Claims - Settlements

2. George Grant an employee of the Division of Maintenance sustained personal injuries as the result of a third party accident (Dairy Transport Company and Kenneth J. Fisher), occurring on March 25, 1963. As the result of said accident, the State Highway Department was required to expend the sum of $42.55 for medical treatment rendered. A formal award was also entered before the Division of Workmen's Compensation for 3% of total, totaling $660.00. Our total compensation lien arising out of this accident for medical and permanent compensation amounts to $702.55. I am attaching, hereto, letter received by the Claims Bureau from Pellettieri & Rabstein, Esqs. dated May 14 with reference to a proposed offer of settlement which is self-explanatory. In the event the State received a full recovery of its compensation lien which would be subject to a statutory contribution toward this employee's counsel fees and expenses of suit, the State would receive the sum of $268.37 net. By accepting the offer of $250.00 as outlined in Ruth Rabstein's letter, we would be waiving the sum of $18.37, the difference between a full settlement and the proposed offer of settlement. Giving due consideration to the possibility of a verdict being returned for an amount less than the present offer of settlement, we feel the State would be justified in accepting the sum of $250.00 net in full settlement of its compensation lien. It is our recommendation, and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack, that the proposed offer receive favorable consideration. (June 2, 1964)

67. There is presented a report concerning the matter of a relocation payment for Anthony Sodano, tenant of Parcel 48, Route 280, Section 6, Project I-280-6-(5), for which the Commissioner previously approved a Right of Way Agreement. Mr. Sodano moved from the premises on October 1, 1963; after his relocation he presented a receipted bill in the amount of $120.00. He did not comply with all departmental procedures and submitted the estimate prior to his move. Mrs. Sodano during a discussion with one of our negotiators, misconstrued the discussion to mean that she had to vacate said parcel prior to December 1, 1963. There are extenuating circumstances. A review of the receipted bill incidates that the amount of $120.00 is reasonable for the relocation costs. Authority is requested to make payment to Mr. Sodano on the basis of the receipted bill and executed departmental Relocation Certification Claim Form in the amount of $120.00. (June 8, 1964)

SCHEDULE OF APPROVALS - JUNE 30, 1964

Administrative Items

Insurance

1. Approval is recommended of providing Manufacturers and Contractors' Liability Insurance with basic limits of $10,000/$10,000 bodily injury and $10,000 property damage at an annual cost of $15,000 in accordance with the attached reports. (June 17, 1964)

Claims-Cancellation

2. This claim arises out of damage to electric directional signs located on Route 1 and North Bergen traffic circle, North Bergen Township, New Jersey. This equipment was damaged on August 16, 1956 by a vehicle owned by Emma T. Fournier and operated by her son, George Fournier. Numerous attempts were made to locate the individuals and secure payment. Since these efforts were unsuccessful, suit was instituted in May 1959 but no service was effected on the defendants. Service has now been effected on the defendants resulting in their contacting the Claims Bureau with an offer to settle the claim on the payment of $150.00. The Claims Bureau has been advised that the Fourniers are in poor financial circumstances and that the liklihood of a recovery of the full claim would/be dim. In view of the foregoing, it is my recommendation, and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General William J. McCormack, that this claim against Emma T. Fournier and George Fournier be cancelled on the payment by them of $150.00, rather than incur additional expense in obtaining a judgment and endangering recovery of any amount in the event that the judgment cannot be satisfied. (June 26, 1964)

Agreements-C.R.R. of N.J., Route 36, Sections 2B & 3C

10. Approval and execution is recommended of the attached Agreement between the State of New Jersey and the Central Railroad Company of New Jersey, covering understandings in connection with the State's constructuon of Route 36, Sections 2B & 3C, in the Township of Middletown and Borough of Atlantic Highlands, County of Monmouth. The Railroad Company is to be reimbursed for the actual cost of the construction of these facilities, which including 10% for contingencies is estimated at $108,735,26. Route 70, Section 1B-Cherry Hill Township

11. In connection with the State's construction of Route 70, Section 1B, from Browning Road Circle to Cuthbert Blvd., Widening, Resurfacing, Bridges & Interchange at Cuthbert Blvd. in the Twps. of Pennsauken & Cherry Hill, Camden County, the Township of Cherry Hill performed some sewer construction, which they did under permit from the State. This work was not done in accordance with proposed highway construction as authorized by permit and interfered with proposed highway drainage work. This discrepancy was resolved by issuing a Change of Plan in our drainage work, at an increased cost to the State of $400.00. The Township was given a choice of correcting the error or reimbursing the State for the Change of Plan. The Township decided to notify their contractor who forwarded a check to the State of New Jersey in the amount of $400.00. It is, therefore, recommended that the $400.00 check be accepted from Gray & Fear, the Township contractor, as full compensation for the cost of the Change of Plan, thereby relieving the Township of their responsibility in this matter. Construction Program Year 1961 - 62, Item Number 38. (June 26, 1964)

On May 15, 1964, authority was granted to place a condemnation complaint on file immediately for Parcels R32A, R32B and 32D. This action was granted in order to forestall the construction of buildings which the owner had started within the proposed right of way line; and also with the understanding that negotiations in the regular manner would eventually be conducted in an effort to reach an amicable settlement. It was later indicated that the parcels were non-contiguous and that separate complaints should be filed. The owner's demands of $32,000 for Parcel R32A are considered excessive. The matter is therefore submitted with a request that the previous action be discontinued and that authority be granted to institute condemnation proceedings for Parcel R32A. 9. Approval and execution is recommended of attached Order No. PUO-53-78-3G; NJ-I-78-3(9)19, Contract 3B issued to the New Jersey Telephone Company covering understandings in connection with the rearrangement of their facilities to accommodate the construction of Freeway Interstate Route 78, Section 3G, in the Township of Tewksbury, County of Hunterdon. The Utility Company is to be reimbursed for the actual cost of the rearrangement work, which including 10 per cent for contingencies is estimated at $43,000. Construction Program Year 1963-64, Item Number 15. (July 13, 1964)

Claims-Settlements

10. The New Jersey State Highway Department has a third party claim in the amount of $1,969.11 against William Oakley in connection with medical expenditures and temporary compensation payments made on behalf of George DeLillo, who sustained personal injuries on March 7, 1963 as the result of an accident involving a vehicle owned and operated by William F. Oakley. Mr. DeLillo retained the services of an attorney to represent him in his claim against the third party, who instituted a suit against William Oakley in the Superior Court, Morris County. Recent negotiations between Mr. DeLillo's attorney and the third party's insurance company has resulted in an offer of $8,500.00. I am attaching, hereto, copy of a letter received from Samuel B. Gould, Esq. in connection with his offer of settlement of the Highway Department's claim which is self-explanatory. In the event the Highway Department received a full settlement of its claim, less statutory deductions for counsel fees, it would net the sum of $1,312.74. The Claims Bureau has in its file a medical report from Dr. Ein who estimates Mr. DeLillo's permanent disability at 7½% of total. This percentage in the compensation court is worth $1,650.00. Attorney Gould advises that he has from his examining doctor, an estimate of 15% of total. If the State's statutory contribution toward counsel fee was calculated on the amount of our previous expenditures, namely $1,969.11, plus the $1,650.00 estimated permanent disability figure, which percentage is conservative, our contribution toward this employee's counsel fee would amount to $1,206.37, in which case the State would net the sum of $762.74. The Claims Bureau has a statement in writing from Mr. Gould that if the offer of settlement in the amount of $1,000.00 net to the State is accepted, Mr. DeLillo will also waive the filing of any formal petition for compensation and the attorney will waive any additional expense incurred in connection with the pending suit which has not been paid. Giving due consideration to the foregoing, we feel the offer of settlement in the amount of $1,000.00 net to the State is very reasonable and it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General, Joseph Lipkin, that it receive favorable consideration and be approved. (July 16, 1964)

11. In accordance with the provisions of s. 78, c. 23, L. 1951 (c. 39:4-138.1) it is recommended that the attached regulation be adopted establishing "no stopping or standing" zones except as provided in c. 39:4-139:

Bids to be received August 13, 1964. Construction Program Year 1963-64, Item Number 28. (July 21, 1964)

Route 35, Section 10B

13. Approval is recommended of the Plans and Specifications for submission to the Bureau of Public Roads and authority to advertise for bids after approval has been received from the Bureau for the Widening, Resurfacing, Barrier Curb and Bridges, including Grade Separation at Broadway and Maple Place on Route 35, Section 10B, from Hobart Avenue to Route 36 Interchange, in the Borough of Keyport, Monmouth County, Federal Project No. U-72(8). Construction Program Year 1961-62, Item Number 11. (July 22, 1964)

Route 37 (1953), Section 1A

14. Foundations and Structures, Inc., 118 Country Club Drive, Linwood, New Jersey, Contractor for the construction of Bulkhead at Route 37, Bridge Over Channel Between Pelican Island & Seaside Heights, Township of Berkeley, County of Ocean, on Route 37, (1953) Section 1A, Federal Project Non, have satisfactorily completed the work on this project as of May 4, 1964. It is thereby recommended that the project be finally accepted and 100% payment be authorized. (July 15, 1964)

Route 49 (1953), Section 2B

15. Spearin, Preston & Burrows, Inc., 15 Church Street, New York 61, New York, contractor for the Penns Neck Bridge Fender System Repair, Lower Penns Neck Twp., City of Salem, County of Salem, has satisfactorily completed the work as of August 1, 1963, Route 49 (1953), Section 2B, Federal Project - Non. It is thereby recommended that this project be finally accepted and 100% payment authorized. (July 21, 1964)

Route 95, Section 1E

16. The above noted project (Route 95, Section 1E) has been satisfactorily completed and semi-finally accepted by Commission Action approved under date of June 26, 1964; said Commission Action further authorizing a semi-final payment withholding one percent of the value of the completed work and requiring that the Contractor furnish a bond representing the value of possible liquidated damages. With reference to completion dates as established in the original contract specifications and addendums thereto for the various construction stages, liquidated damages in the approximate amount of $1,302,000 have been estimated. By Change Order No. 6, dated May 15, 1962 and approved by the State Highway Commissioner, time extensions for the several construction stages were granted whereby the entire work of the project should be completed by December 31, 1962. This Change Order was also previously approved by the Bureau of Public Roads, but said approval was subsequently withdrawn after review by legal personnel of their Washington, D.C. office. By Change Order No. 2-B Final, prepared by the Bridge Division under date of December 5, 1963 and approved by the State Highway Commissioner, a further extension of time of six months to June 30, 1964 for completion of the Edgewood Road Bridge was granted. However, this Change Order and time extension has not been approved by the Bureau of Public Roads. Although the Bureau of Public Roads has withdrawn their approval of Change Order No. 6 and the time extensions granted therein, the State Highway Commissioner's approval thereof is still effective as no revision or withdrawal of approval by the Commissioner has been made. Upon further review, the several reasons stated in previous Change Order No. 6 are still considered as warranting the time extensions granted therein and to be in accordance with past procedures and policies used by the Highway Department in the administration of construction projects. The Department and the public has suffered no monetary loss through delay in completion of the project, but has benefited in a substantial amount by the use of materials produced by the equipment which has caused the major delays. Insofar as Change Order No. 6 would provide an extension of time to December 31, 1962 and reduce the estimated liquidated (Continued)

16. (Con.) damages in the approximate amount of $1,048,500, it is recommended that the stipulation of previous Commission Actions for the furnishing of bonds be deleted and any outstanding bonds now in effect be returned. This recommendation is made subject to the further provision that the Department institute legal action to secure the reinstatement of previous approval of the time extensions by the Bureau of Public Roads and thereby avoid the monetary loss that would be occasioned by their non-participation in the amount of the estimated liquidated damages that would otherwise occur. (July 22, 1964)

Route 95, Section 1G

17. The above noted project (Route 95, Section 1G) has been satisfactorily completed and semi-finally accepted by Commission Action approved under date of June 26, 1964; said Commission Action further authorizing a semi-final payment withholding one percent of the value of the completed work and requiring that the contractor furnish a bond representing the value of possible liquidated damages. With reference to the completion dates as established in the original contract specifications for the various construction stages, liquidated damages in the approximate amount of $711,000 have been estimated. However, Change Order No. 18, dated May 15, 1962 and approved by the State Highway Commissioner, granted time extensions for the several stages of construction. This Change Order was also previously approved by the Bureau of Public Roads, but said approval was subsequently withdrawn after review by legal personnel of their Washington, D.C. offices. Although the Bureau of Public Roads has withdrawn their approval of Change Order No. 18 and the time extensions granted therein, the State Highway Commissioner's approval thereof is still effective as no revision or withdrawal of approval by the Commissioner has been made. Upon further review, the several reasons stated in previous Change Order No. 18 are still considered as warranting the time extensions granted therein and to be in accordance with past procedures and policies used by the Department in the administration of construction projects. The Department and the public has suffered no monetary loss through delay in completion of the project, but has benefited in a substantial amount by the use of material produced by the equipment which caused the major delays. Insofar as Change Order No. 18 would provide an extension of time to such extent that no liquidated damages would be applicable, it is recommended that the stipulation of previous Commission Actions for the furnishing of bonds be deleted and any outstanding bonds now in effect be returned. This recommendation is made subject to the further provision that the Department institute the necessary legal action to secure the reinstatement of previous approval of the time extensions by the Bureau of Public Roads and thereby avoid the monetary loss occasioned by their non-participation in the amount of the estimated liquidated damages that would otherwise occur. (July 22, 1964)

Condemnation proceedings were previously authorized for Parcel 90, Main and Munn Realty Co., Inc. at which time the owner did not state monetary demand. Denburg as Trustees in liquidation of Main and Munn Realty Co., Inc. It is recommended that this agreement be approved and that condemnation proceedings previously authorized be discontinued. 100. There is presented again the matter of condemnation of lands on Route 287 (1953), Section 5, Project I-287-1-(12), Klines Mill Road to Route U.S. 202 & 206, Parcels 62A and 62B, William C. F. Schneider and wife. At the trial before condemnation commissioners, the testimony on behalf of the owner was in the sum of $9,730 and the testimony on behalf of the State was in the sum of $5,560. The commissioners made an award in the sum of $7,800. To insure that the State would be in time, the Legal Department immediately filed an appeal, although this action was not officially of record. The owner's attorney also appealed. Prior to the appeal trial, it was subsequently determined through the Sanitary Engineer's report, that the owner's septic system would have to be completely revamped as a result of the State's acquisition. The cost of this revamping, if added to the State's Real Estate testimony, would total $7,005., which is the sum that the State experts would have testified to in the appeal. Pre-trial discussions by the attorneys for the State and the owner, resulted in a verbal settlement in the amount of the commission award, $7,800. The owner later refused to execute an agreement in this amount and the trial attorney recommends that the commission award of $7,800 be approved without interest and if the owner fails to accept same, that the money can be paid into Court. STATE HIGHWAY DEPARTMENT

SCHEDULE OF APPROVALS - JULY 31, 1964

Administrative Items

Prequalification of Bidders

1. Approval is recommended of the attached list of assignment of classifications and/or re-classifications of prospective bidders as prepared by the Prequalification Committee in accordance with R.S. 52:35. The Committee consists of the Comptroller, Director and Chief Road Engineer, Counsel and State Highway Engineer. (July 30, 1964)

Claims-Settlements

2. This claim arises out of damage to traffic signal equipment located at Route 22 and Meeker Avenue, Newark, New Jersey damaged on February 9, 1961 by a vehicle owned by Lawrence Paul Agency and operated by Daniel L. Dowd. Cost of repair to the damaged equipment was $85.47. The defendants, in this case, refused to make any voluntary payment, contending that the equipment was not in good working order at the time of the accident and was the precipitant cause for the accident. Suit was instituted in order to recover the amount of the claim. The defendants have now offered to compromise this claim by the payment of $50.00. The Claims Bureau has concluded that there may be some difficulty in establishing responsibility for the damages sustained, that the cost of procuring testimony may exceed the difference between the full claim and the compromise offer and that, therefore, the best interest of the State would be served by accepting the offer of compromise. In view of the foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deputy Attorney General William J. McCormack, that this claim against Lawrence Paul Agency and Daniel L. Dowd be cancelled upon the payment of $50.00 rather than proceeding in the pending litigation. (July 27, 1964)

3. The State Highway Department is currently carrying on its books a claim against the South Jersey Construction Company in the amount of $172.66, arising out of an accident occurring on August 20,1962. On the date in question,equipment owned by the South Jersey Construction Company damaged an underground conduit while excavating a trench on job #2526-51-07. The contractor upon being presented with a bill covering the cost of making the necessary repairs to the conduit replied to the Electrical Division denying liability. A copy of the contractor's letter is attached hereto and is self-explanatory. An investigation was conducted by the Electrical Division of the State Highway Department which substantiated the position taken by the contractor. The investigation disclosed that the construction plans furnished the contractor by the State Highway Department did not show an existing conduit beyond the electrical junction box where it was damaged by the contractor. In view of the foregoing, we feel the claim against the South Jersey Construction Company should be cancelled, and it is our recommendation and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack that the request contained in Mr. Henderson's memorandum receive favorable consideration. (July 28, 1964)

Agreements-Delaware River & Bay Authority-Cape May-Lewes Crossing

4. Approval and execution is recommended of the attached agreement dated July 20, 1964, between the Delaware River and Bay Authority and the State of New Jersey covering understandings in connection with the Authority's construction of approaches and appurtenances to the Cape May-Lewis Crossing of the Bay. (July 29, 1964)

Services-Engineering

5. The estimate of construction cost of $3,100,000 is presently utilized for reimbursement with John G. Reutter Associates in our agreement for engineering services in connection with U.S. 9 dated October 31, 1961. A revised estimate has been prepared based on actual contracts awarded for Sections 23A, 24A and 23D and an engineers estimate for Sections 22B and 23C. The sum of these indicates the estimated cost to be $3,672,038.95. The funds available in this account are not sufficient to cover the balance due the consultants. It is therefore recommended that an additional $25,000 be set up to cover payment because of this more definite cost. (July 29, 1964)

Utilities-Township of Saddle Brook

6. Under Utility Agreement #PUA-55-80-4F with the Township of Saddle Brook for the relocation of water facilities, the estimated cost at that time was $28,798 which included engineering but not including contingencies. However, actual costs as evidenced by invoices submitted amounts to $38,201.92 or 32.65% over estimated cost. For the reasons enumerated in the attached memorandum dated July 15, 1964 from Mr. Erb, Engineer of Utilities, it is recommended that an additional amount of $9,403.92 be set up to cover the cost of PUA-55-80-4F. (July 23, 1964)

Utilities-Route 280, Section 6C

7. Approval and execution is recommended of the attached Agreement, between the State of New Jersey and the Board of Water Commissioners, City of East Orange, in connection with the State's construction of Freeway Interstate Route 280, Section 6C a portion of which will pass through the City of East Orange. This construction will necessitate the relocation of Water Facilities of the existing water system, which is owned and operated by the Board. The State will make or cause to be made certain revisions and rearrangements to the facilities of the existing water system, also the State will reimburse the Board for charges for engineering services necessitated by said water system rearrangement work. Further, the State will also reimburse the Board for actual costs resulting from the employment of Board personnel on the water facility rearrangement work. The total cost of the above reimbursable work including 10 per cent for contingencies is estimated at $18,000. Construction Program Year 1963-64, Item Number 20. (July 23, 1964)

The Utility Company is to be reimbursed for the actual cost of the rearrangement work, which including approximately 10 percent for contingencies is estimated at $245,500. Route 22, Thompson Ave. Underpass

13. A tractor semi-trailer damaged the fascia beam on the Route 22 eastbound underpass at Thompson Avenue, Bridgewater Township, Somerset County, New Jersey. Structural damage to the beam is considered severe. The Department's Bridge Division developed a scheme for replacement of the entire beam and the superimposed load thereon, which solution also required extensive traffic controls. The estimate of cost utilizing this scheme is $12,500. Due to the nature of the damage and the unusual structural problems involved, it was felt that private negotiations with a qualified steel erecter could uncover a more adaptable solution which would result in an overall reduction in the cost of replacement to the Department. With this in mind, Wm. F. Haggerty, Inc. was contacted and requested to submit suggestions for an alternate scheme. They developed a solution considered unique, which proposed to remove only that portion of the structural steel damaged; weld a new section of steel as (Continued on next page)

13. (Continued) replacement for the damaged portion; reconstruct diaphragms as required; paint the area of the beam; provide for the necessary maintenance of traffic in conjunction with our Traffic Division. The aforementioned scheme was given consideration by the Bridge Division, and subsequently a firm price was requested for this work. The quote by Wm. F. Haggerty, Inc. is $7,865. The existing condition is considered to be an emergency , and it is requested that the normal advertising procedure be waived for this project. Claims-Settlement

3. The New Jersey State Highway Department has a claim against the Red Star Towing Line in the amount of $780.13 arising out of an accident occurring at the Victory Bridge on January 30,1963 involving the Tug Providence. As the result of said accident, the fender system was damaged and had to be repaired at a cost of $780.13. Upon being presented with the Highway Department's charges, the Red Star Line disclaimed liability for the entire damage for which they were billed, contending the possibility of their being charged for "old damage" caused by other vessels passing through the draw which went unnoticed. The Towing Line further advised that the Captain of the Providence in his report admitted hitting the fender system causing minor damage to two planks. An offer of $500.00 was made by the Red Star Line in full settlement of this claim, which offer was rejected by this office. Subsequent negotiations by the Claims Bureau has now resulted in the Towing Line offering their top figure of $600.00. Giving due consideration to the fact that, in the event of suit, it would undoubtedly cost the State more than the sum of $160.13, the amount we have been asked to compromise, in order to try this case and obtain a judgment. In view of the foregoing, we feel the offer of $600.00 should receive favorable consideration and it is our recommendation that it be approved, in accordance with Mr. Levine's memorandum, attached hereto, and the recommendation of Deputy Attorney General William J. McCormack. (August 25, 1964)

89. There is presented a report concerning relocation payment for Mrs. Carl Von Lengerke, tenant of Parcel R45 on Route 280, Section 6, Project I-280-6-(5), on which a Right of Way Agreement was previously approved. Mrs. Von Lengerke moved from the above parcel on June 20, 1964, and has presented a moving claim in the sum of $65.00. She did not comply with our departmental procedures and did not submit two estimates for State review prior to her move. The estimates were received June 25, 1964. The reason Mrs. Von Lengerke did not comply with our procedures is that she is eighty-nine years old and has been living daily attended by anurse at the Alvord Hotel. The President of the Alvord hotel notified the remaining guests, one of which was Mrs. Von Lengerke, that the hotel would close June 20, 1964, this was confirmed by a letter from Mr. Robert Burns, President of the Alvord Hotel, dated July 3, 1964. These are extenuating circumstances and a review of the estimates reveal that the sum of $65.00 is reasonable for Mrs. Von Lengerke's relocation costs. Authority is requested to make payment to Mrs.Von Lengerke on the basis of the submitted paid bill in the amount of $65.00, and the estimate from Cook's Express Movers. (August 24, 1964)

Passaic Valley Water Commission
Utilities-Route 80

3. Under Utility Agreement with the Passaic Valley Water Commission for the relocation of water facilities to accomodate the construction of Route 80, the actual costs by invoices submitted amounts to $100,846.29 or 37 per cent over the estimated cost. The reasons for the excess are as follows:

(1) Original estimate was low in labor or time involved in actual construction. The nature of the job required the work forces to construct on a piecemeal basis which required many return trips to the job site to complete a single unit of work. Original estimate did not consider such extensive, inefficient, piecemeal construction.
(2) To avoid delays to our road contractor and to expedite the work, the use of overtime was authorized. We can account for nearly $3,000 in overtime alone. The use of overtime was authorized by Change Order #1, dated April 25, 1963. It is therefore, recommended that the additional amount of $27,303.26 be set up to cover the cost of the work. Construction Program Year 1961-62, Item Number 22. (August 28, 1964)

SCHEDULE OF APPROVALS - SEPTEMBER 11, 1964

Administrative Items

Prequalification of bidders

1. Approval is recommended of the attached list of assignment of classifications and/or reclassifications of prospective bidders as prepared by the Prequalification Committee in accordance with R.S. 52:35. The Committee consists of the Comptroller, Director and Chief Road Engineer, Counsel and State Highway Engineer. (September 2, 1964)

Claims-Settlements

2. This claim arises out of damage to traffic signal equipment located at U.S. Route #1 and Avenel Street, Woodbridge, New Jersey, damaged as the result of a vehicular accident on March 14, 1960 involving a vehicle owned by Robert Kubish and Pioneer Paper Stock Company. Investigation by the Claims Bureau has disclosed that Robert Kubish is deceased, that the Pioneer Paper Stock Company has available witnesses that the responsibility for the accident rests upon Robert Kubish. The insurance carrier for Pioneer Paper Stock Company has offered to compromise this matter to avoid litigation by the payment of fifty percent of the claim, which is in the amount of $164.43. The Claims Bureau has concluded that it would be extremely difficult to sustain a verdict against Pioneer Paper Stock Company and that further expense would be incurred in the event litigation was made necessary. In view of the foregoing it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deputy Attorney General William J. McCormack that the claim against Robert Kubish and Pioneer Paper Stock Company in the amount of $164.43 be cancelled upon the payment of $82.22 rather than incur additional expense in what would probably be a futile attempt to recover the balance of the claim through court proceedings. (September 11, 1964)

- - - - - - - - - - -

3. This claim arises out of damage to underground conduit serving highway lighting equipment located at Route 18 and Main Street, Old Bridge, New Jersey. This cable was damaged in the course of excavation by forces of the Jannarone Engineering Company who were excavating for a sewer line on July 3, 1963. A claim in the amount of $167.49 was presented to the Jannarone Engineering Co. on the theory that it was solely responsible for the damage to the equipment. The company refused to pay this claim defending on the basis of its precautionary procedure prior to beginning its operation. Suit was instituted and notice received of the company's intent to defend the case based upon its freedom from negligence. The company has offered to compromise by the payment of $83.75 rather than incurring a greater expense in defending the case. The Claims Bureau has concluded the State would best be served by not proceeding with this case in view of the possibility that its expense in proving the case would be greater than the amount to be collected. In view of the foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deputy Attorney General William J. McCormack, that this claim against Jannarone Engineering Co. in the amount of $167.49 be cancelled on the payment of $83.75 and that the pending suit against this company be dismissed after such payment. Claims-Settlements

7. There is presented a claim arising out of damage to a Highway Department vehicle September 15, 1963 which occurred on Route 82, Union, New Jersey. Cost of repair of repair of the damaged vehicle was $75.09. Damage to the Highway vehicle was caused by a vehicle owned by Judith DiSpirito and operated by Peter DiSpirito. (cont'd)

(cont'd) NO. 31 - 1964

Upon failure of the Claims Bureau to affect a voluntary settlement of this case, litigation was instituted in the Union County District Court. The Claims Bureau has been contacted by the carrier for the defendants who has offered to make a compromise settlement of $49.10 since it believes the repair cost to he high and their assureds to be not entirely responsible for the accident. The Claims Bureau has concluded that the difference between the compromise offer and the full amount of the claim does not justify further prosecution of the pending litigation. In view of the foregoing it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deputy Attorney General, William J. McCormack, that the claim against Mr. and Mrs. DiSpirito be cancelled upon the payment of $49.10 rather than impair additional expense in an attempt to recover the full amount of the claim. (September 14, 1964)

Utilities-Route 24, Jersey Central Power & Light Co.

8. In connection with the widening of Route 24 through the Township of Springfield, it will be necessary to relocate an existing Jersey Central Power & Light Company pole line primarily within the limits of the existing State Highway right of way. Several years ago, approximately 15 local businesses replaced the existing aerial electric service connection, at their own expense, between their buildings and the pole line with an underground service. These underground services can, therefore, be considered as being privately owned. The property owners have been requested to relocate their underground services at their own expense. The property owners have appealed to the Public Utility Commission stating that this is an injustice. The Jersey Central Power & Light Company cannot remove it's electric facilities from the pole line interfering with State's construction contract until disposition of the aforementioned private services is made. It is estimated that it will cost approximately $6000 to relocate these privately owned underground services. It is, therefore, recommended that $6000 be set up for this purpose and Jersey Central Power & Light Company be authorized to have the privately owned electric service connections relocated. (September 17, 1964)

Utilities-Route 78, Section 4H, Jersey Central Power & Light Co.

Approval and execution is recommended of the attached Order No. PUO-33A-78-4(2); NJ-I-78-4(2)35, Contract #4B, issued to the Jersey Central Power & Light Company covering understandings in connection with the rearrangement of their facilities to accommodate the construction of Freeway Interstate 78, Section 4H, located in the Township of Warren, County of Somerset. The Utility Company is to be reimbursed for the actual cost of the rearrangement work, which including approximately 10% for contingencies is estimated at $49,800.00. Construction Program Year 1964-65, Item No. 8. (September 14, 1964)

Agreements-Board of Water Commissioners, City of E. Orange, Rt. 280 Sec. 6C

10. Approval and execution is recommended of the attached agreement between the Board of Water Commissioners, City of East Orange and the State of New Jersey covering understandings in connection with the relocation of certain facilities of the existing water system which is owned and operated by the Board, to accommodate the construction of Freeway Interstate Route 280, Section 6C, located in the City of East Orange, County of Essex. The State will reimburse the Board for the work it must perform to accommodate the State's construction, which work is estimated at $84,500.00, which includes approximately 10% for contingencies. (September 16, 1964)

This action supersedes all previously adopted orders, regulations, ordinances and resolutions which cover or are inconsistent with the provisions of this regulation. (September 19, 1964)

Route 78-Viaduct over P.R.R.,Newark

14. In the designing of Route 78, it is necessary to construct a large viaduct structure over the Pennsylvania Railroad in Newark. The Bureau of Public Roads' Policies and Procedures limit participation in all shoulders on structures to a width of ten feet from the main traveled pavement to the balustrade of the bridge. This is contrary to our policy of providing a 12-foot shoulder. In New Jersey, we feel that a 12-foot shoulder is an absolute minimum due to the fact that our roads are carrying such high volumes of traffic which include a large percentage of trucks. We have made studies that prove that a truck cannot stand on a 10-foot shoulder without interfering with the safety and capacity of the route. It has a serious affect upon the adjacent lane. It has been decided that on all structures of average length, that we will provide a 12-foot shoulder plus one and one-half foot clearance to the parapet, but because of the magnitude of this structure, it is felt that we should have further approvals. This structure will cost approximately $8,600,000, and the cost for the additional shoulder width in which the Federal Government will not participate will be approximately $223,000. This is only 2.6% of the total cost. If the additional shoulder width is provided, the following becomes apparent:

1. The cost to the State is only a small percentage of the entire cost.
2. The safety of the route will be increased.
3. It will allow someone in the future to provide four more lanes for moving traffic.
4. More space will be available for disabled vehicles.
5. Since the roadway portion provides for 12-foot shoulders, to reduce the width of shoulders on the structure to 10 feet would introduce reverse curvature in the alignment, which would be objectionable from a geometric design standpoint.

In view of the above, it is hereby recommended that adequate safe shoulders be provided on this structure with proper clearance to the parapet. (September 19, 1964)

Miss Ege moved on June 17, 1964, prior to submitting two moving estimates to this office for relocation. These estimates were received by us on June 25, 1964, and our investigation indicated that Miss Ege was told to move by the owners before June 20, 1964, at which time the hotel would officially close since the owners of the hotel had entered into an agreement with the Highway Department for the acquisition of the property. It is apparent that Miss Ege, due to conditions caused by her age and the fact of being forced to relocate, did not follow procedures exactly as she moved prior to submitting her estimates. However, upon further investigation, it was indicated that the amount of $78.00 for her relocation is fair and reasonable. It is therefore recommended (cont'd)

that this case be submitted to the New Jersey State Highway Commissioner with the request that relocation costs in the amount of $78.00 be approved for Miss Ege's relocation costs. (September 21, 1964)

SCHEDULE OS APPROVALS-OCTOBER 31, 1964

Administrative Items

Claims-Settlements

1. Reference is herewith made to an accident occurring at the Victory Bridge, Perth Amboy on October 1, 1962 involving the Oil Tanker "George Whitlock III". As the result of said accident, the fender system was damaged which had to be repaired at a cost of $816.79, plus Department overhead of $81.68, making a total claim of $898.47. Upon being presented with a bill, the owners of the vessel objected to the amount of our charges claiming that a survey was held and the estimate given to make the repairs amounted to $770.00. It was pointed out during our discussion that inasmuch as, the owners had a survey figure for $770.00, they did not ask for depreciation which they always do in accidents of this type. The offer of settlement in the amount of $770.00 was discussed with Mr. John Thomson, Supervisor of Bridges and Structures, who suggested that we attempt to get the owners of the vessel in question to meet us half way between the full amount of our claim and the survey figure. Subsequent negotiations by the Claims Bureau have now resulted in the debtors agreeing to reimburse the Highway Department the sum of $834.24 in full settlement of the claim. By accepting this offer of $834.24, the State would be waiving the sum of $64.24. In the event suit was instituted in order to collect the full amount of this claim, it would undoubtedly cost the State the sum of $64.00 to process the litigation even if the case was settled prior to trial. Giving due consideration to the fact that the debtors would be entitled to a depreciation allowance on the material used to make the repairs, we feel the offer of settlement is reasonable and it is our recommendation that it be approved and in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General Joseph Lipkin. (Oct 29, 1964)

Utilities-Route 80

2. Under order #PUO-15B-80-2; NJ-I-80-2(6)26, Contr. #3C issued to the New Jersey Power and Light Company, the original funds set up amounted to $156,970 which included contingencies. However, the total cost under this order will amount to approximately $214,000 or $57,000 over the amount allocated.
Some contributing factors for increase cost are listed hereunder:

(1)	Change Order No. 1 - Temporary around Salmon property	$1,000.
(2)	Change Order No. 2 - 3 phase circuit addition on Flander Rd.	1,600.
(3)	Change Order No. 3 - Tower modification	6,418.
(4)	Other extra work requiring Change Orders	11,600.
	TOTAL	$20,618.

In addition to the above factors, it is apparent that the original estimate was low in the approximate amount of $36,000. It is, therfore, recommended that an additional $57,000 be set up to cover the work performed under Utility Order PUO-15B-80-2. Construction Program Year 1962, Item Number 20. (Oct 27, 1964)

Utilities-Route 287

3. Under Utility Agreement No. PUA-79-287-6C, NJ-I-287-2(4)22, Contract #3, with the Tide-Water Pipe Line Company, Ltd. in connection with Freeway Interstate 287, Section 6C an original estimated amount of $52,915.00 was set up (excluding contingencies), however, the total cost of the work covered under this Agreement, has billed the State amounts to $69,527.49. This amount is $16,612.49 or 31.39% in excess of the original estimated amount. Analysis of the additional cost indicated reflection of overall higher contract costs as compared to estimated contract costs submitted by the Company. Approval is recommended of the additional cost of $16,612.49, making a revised total cost of $69,527.49 to cover work called for under the above-mentioned Agreement. Construction Program Year 1962-63, Item Number 30. (Oct 29, 1964)

Approval and execution is recommended of the attached Agreement dated October 28, 1964 between the Township of Maplewood, Essex County, and the State of New Jersey covering understandings in connection with the proposed improvement of Boyden Avenue and State Highway Route 24 Intersection by the Township. Inasmuch as the estimated cost for this work exceeds the amount of funds available, and whereas the State will derive benefit from the said improvement, further assistance to the Township is justified. It is, therefore, recommended that an estimated amount of $10,800.00 be set up representing the State's share of the improvement of Boyden Avenue and Route 24 Intersection in the Township of Maplewood, Essex County, New Jersey. As these needs are controlled by the State forces, it is recommended that an additional $10,000.00 be set up to cover work for the engineering field services as defined in part SECOND (a) 2. of our agreement. This would increase the ceiling on this phase to $16,000.00. (November 6, 1964)

The difference in cost between the Township's original proposed construction and the modified construction to meet State alignment is estimated at $1,450.00. It is recommended that the Township of Neptune be reimbursed for additional cost they will incur as mentioned above at the estimated amount of $1,450.00. Miss Wehausen moved and did not submit a paid bill nor two estimates to this office. Her personal property was moved by her neighbors. The reason Miss Wehausen did not submit her estimates was because she was a patient at Essex County Hospital when we forwarded our letter to her explaining our Relocation Advisory procedures and requesting two estimates from her from qualified movers. Miss Wehausen later transferred from Essex County Hospital to Mountain View Nursing Home, Wayne, New Jersey. Miss Wehausen has indicated in one of her letters that it cost her

(contined)

(contd.) approximately $100.00 to $125.00 for her moving expenses. Our field representative has verified and substantiated this moving claim. These are extenuating circumstances and the cost of $125.00 seems reasonable. Authority is requested to make payment to Miss Wehausen for her relocation costs upon her submittal of an executed departmental certification claim form and an invoice AC-8 form. (November 2, 1964)

SCHEDULE OF APPROVALS - NOVEMBER 16, 1964

Administration Items

Services-Engineering

1. Our agreement with Taylor, Wiseman, Taylor & Sleeper, dated November 22, 1961, for services relative to Route 295, provides for remuneration on a fee basis of 3.7% of a tentative estimate of construction cost of $5,000,000.00 which amounts to $185,000.00. The project has been completed, and the final revised cost estimate is $5,574,151.04, which amounts to $206,243.59. Paragraph THIRD (c) stipulates that if the final approved estimate of quantities indicates a variance of more than 10% of the aforementioned $5,000,000 either party may request a review of conditions causing the variance and, if deemed equitable, enter into a supplementary agreement in order to remedy same. The project has been reviewed, and since the final estimate is in realistic conformity with the intent of paragraph THIRD (c), renegotiation of the fee is not considered necessary. Normally, an additional $21,243.59 would be added to the account. Since monies were previously provided which allowed for contingencies, the additional monies necessary amount to $12,548.78. It is therefore recommended that this $12,548.78 be set up to meet the requirements of the final invoice and that the account then be closed. (November 9, 1964)

1. Approval and execution is recommended of attached Agreement #1 between the State of New Jersey and the New Jersey Bell Telephone Company covering understandings in connection with the State's construction of Drainage Facilities in Route 168, Gloucester Township, Camden County. Construction of these facilities will necessitate the relocation of a 9-duct telephone conduit belonging to the Company. The State and the New Jersey Bell Telephone Company for the mutual benefits obtained have agreed that the State will change its plans for cross drains, so as to avoid the necessity of the Company's relocating its facilities; and that the Company will reimburse the State for the cost of the change, which amounts to $1,468.50 based on the State's contractors unit prices. Construction Program Year 1963-64, Item No. 41. (November 17, 1964)

Services - Engineering

2. Due to the pressure of work, the Department's Electrical Bureau was unable to provide the electrical plans required for Route 80, Section 4 between Wayne Township and the Garden State Parkway encompassing the area included in our agreement with Fay, Spofford & Thorndike dated April 17, 1957. The State's consultant was authorized to prepare the contracts for this area by letter dated March 17, 1959. The contingency setup has provided reimbursement for this extra work to date. Numerous other changes have depleted the funds previously provided for this agreement. It is therefore recommended that an additional $88,000.00 be set up to cover the bulk of the work performed for the electrical contracts. (Nov. 20, 1964)

Services-Engineering

8. The contract plans for the Route 9 dualization from Route 18 to Freehold, performed by John G. Reutter and Associates under the terms of our agreement dated October 31, 1961, have been submitted to the Highway Department and are awaiting advertisement. Under the terms of our agreement, a retainage of 5% is withheld until the contracts are accepted by the State. Since the project has been substantially completed, the only service remaining to be performed being the checking of shop drawings, it is recommended that the fee retainage for this project be reduced to 1%. The more recently executed consultant agreements automatically provide for the reduction in retainage at this state of completion. (Nov 24, 1964)

Utilities-Route 78, Section 3F

9. Approval and execution is recommended of the attached Order No. PUO-56-78-3F: NJ-I-78-3(9)19, Contract #3B, issued to the New Jersey Telephone Company covering understandings in connection with the rearrangement of their facilities to accommodate the construction of Freeway Interstate 78, Section 3F, located in the Townships of Clinton, Readington and Tewksbury, County of Hunterdon. The Utility Company is to be reimbursed for the actual cost of the rearrangement work, which including approximately 10% for contingencies is estimated at $40,480.00. Agreements-Pennsylvania Railroad Company

10. Agreement #3 dated September 13, 1963, between the Pennsylvania Railroad Company and the State of New Jersey set up an estimated amount of $39,620.12 to cover reimbursement cost. However, final billing shows that this figure has been exceeded by $7,942.84. The reason for the overrun of this estimate was due to an inadequate initial estimate and considerable higher labor costs because the work was performed in the winter months rather than the spring and summer on which the estimate was based. It is, therefore, recommended that an additional amount of $7,942.84 be set up to permit audit processing of the final invoice. Construction Program Year 1961-62, Item Number 39. (Nov 24, 1964)

Claims-Settlements

11. The State Highway Department is carrying a claim against the Moran Towing and Transportation Company in the amount of $723.49 arising out of an accident occuring at the Victory Bridge on October 25, 1963. At the time of the accident, the SS "Chancellorsville" was being escorted through the Victory Bridge draw by the Tugs "Eugene Moran" and Marie Moran". While the vessels were passing through the draw, the "Chancellorsville" struck the bridge ladder and railing and also damaged, according to the bridge tender's report, three pieces of sheathing on the South Amboy side of the center fender. When the repairs were made, 12 peices of 6" x 8" x 12" creosote pine were used by the Highway Department to repair the damaged fender. I am attaching, hereto, copy of the survey report which calls attention to the fact that the Steamship in question did not cause all the damage for which it was billed. The copy of the survey report was turned over to the Claims Bureau during a recent discussion of the State's claim with the Shipowners Claims Bureau, Inc. In view of the information contained in this report, we contacted the Highway representative, Mr. Flynn, who recalled that during the survey the appraiser for the vessel involved had pointed out the moss growing in certain of the broken sheathings, as well as, the five broken at the top which had the appearance of an old origin. The Shipowners Claims Bureau agreed to reimburse the Highway Department for the damaged ladder and railing, but did not feel they were responsible for the fender damage. Subsequent discussion and negotiation resulted in an offer of $444.55 in full settlement of this claim. Before the negotiations were concluded, a final figure of $500.00 was tendered in full settlement of the Highway Department's damage. This claim has been carefully reviewed and discussed with the Maintenance Division officials who felt the offer of $500.00 should be accepted. In the event suit was instituted in order to recover the full amount of this bill, it would be rather difficult to establish 12 pieces of sheathing damaged by the Steamship in question when the bridge tender's report which was prepared immediately after the occurrence indicates that only 3 pieces of sheathing were damaged. In view of the foregoing, we feel the offer of settlement in the amount of $500.00 is fair and reasonable and it is our recommendation that it receive favorable consideration, and the balance of the claim in the claim in the amount of $223.49 be cancelled in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General, William J. McCormack. (Nov 30, 1964)

12. The State Highway Department is carrying six claims against McAllister Brothers Towing and Transportaion Company as set forth below arising out of accidents involving vessels owned by this Company while escorting oil barges through the draw of the Victory Bridge while enroute to the Hess Oil Terminal.

Damage to Victory Bridge 1/30/62.	Amount -	$ 560.20
Damage to Victory Bridge 2/3/62.	Amount -	193.15
Damage to Victory Bridge 8/4/62.	Amount -	82.90
Damage to Victory Bridge 3/28/63.	Amount -	484.32
Damage to Victory Bridge 4/24/63.	Amount -	1,291.61
Damage to Victory Bridge 7/5/63.	Amount -	366.93

A recent conference was held between representatives of the Claims Bureau and McAllister Brothers Towing Company with reference to settlement of these charges. The accident of April 24, 1963 resulting damage which had to be repaired at a cost of $1,291.61 was discussed at quite some length, inasmuch as, the Towing Company has denied liability in connection with this accident.

(Continued next page)

(12 Cont.) The bridge personnel who reported the accident indicated in their report that the barge being escorted through the draw had one tug on each side of said barge and while attempting a maneuver to turn the barge in order to enter the Hess Terminal, the tug on the left side of the barge came in contact with the fender and caused the damage which had to be repaired. The boat company pointed out during our discussion that in this type of maneuver, the two tugs could not be on opposite sides of the barge, and further denied that there was any contact between their vessels and the bridge fender system on the date in question. We advised the McAllister people that we could not accept their version and would have to rely on the statements made by our own personnel and that if the matter could not be resolved, we would have no alternative but to institute suit. It was quickly pointed out that they could not accept the statement of our bridge personnel and completely ignore their personnel. At the conclusion of our discussion, an offer was made by McAllister Brothers to reimburse the State in full for all claims now pending with the exception of the accident occurring on April 24, 1963. In an effort to dispose of this claim without the necessity of suit, an offer of 50% was made. The Towing Company's proposal was discussed with the Maintenance Division's officials who felt the offer should be accepted rather than incur considerable cost and the expenditure of time in attempting to collect the full amount of this claim through litigation, where the risk of an adverse decision always exists in this type of situation. In view of the foregoing, it is our recommendation that favorable consideration be given to the offer made by McAllister, whereby, the State Highway Department would receive full settlements in five of the cases set forth above and would receive a 50% settlement in the claim arising out of the accident of April 24, 1963 which is in dispute. This recommendation is also made in accordance with Mr. Levine's memorandum attached, hereto, and the recommendation of Deputy Attorney General William J. McCormack. (Nov 30, 1964)

NO. 41 - 1964

STATE OF NEW JERSEY
STATE HIGHWAY DEPARTMENT
TRENTON

SCHEDULE OF APPROVALS - DECEMBER 10, 1964

Administration Items

Prequalification of Bidders

1. Approval is recommended of the attached list of ~~assignment of classifications~~ and/or reclassifications of prospective bidders as prepared by the Prequalification Committee in accordance with R.S. 52:35. The Committee consists of the Comptroller, Director and Chief Road Engineer, Counsel and State Highway Engineer. (December 2, 1964)

Claims - Settlements

2. The captioned claim covers the cost of repair to traffic signal equipment which was damaged on February 23, 1959 as the result of a motor vehicle accident occurring on Route 1 and Sip Avenue, Jersey City, New Jersey. Two vehicles were involved in this accident, one owned by Sterling Creek Coal Company and operated by Howard Paul Hartranft, and another owned by Highley Coan and operated by Jessie Willie Hazelbaker. Cost of repair for the damaged property was $1,608.89. After the defendants Highley Coan and Jessie Willie Hazelbaker ignored correspondence to them and defendants Sterling Creek Coal Company ahd Howard Paul Hartranft denied liability, suit was instituted in order to recover on the State's claim. Judgment has been obtained in the full amount of the claim against defendants Highley Coan and Jessie Willie Hazelbaker. Defendants Sterling Creek Coal Company and Howard Paul Hartranft have now offered to pay $150.00 in full settlement of any claim against them contending that the State cannot establish liability on their part. After review of the evidence in this case it appears that there is a strong possibility that it would be impossible to obtain a judgment against Sterling Creek Coal Company and Howard Paul Hartranft. In view of the foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto, and the recommendation of Deputy Attorney General, William J. McCormack, that the claim against Sterling Creek Coal Company and Howard Paul Hartranft be cancelled upon the payment by them of $150.00 rather than incur additional expense by proceeding in the pending litigation and expose the State to the possibility that no recovery may be secured against these defendants. (December 2, 1964)

---

3. The captioned claim covers the cost of repair to traffic signal equipment which was damaged on November 10, 1963 as a result of a motor vehicle accident occurring on Route 36, Raritan Township, New Jersey. This equipment was damaged by a vehicle owned and operated by Lester J. Kennedy. Cost of repair for the damaged property was $115.84. It is the defendant's contention that responsibility for the damage to the State's property should also be shared by the contractor working in the area. When voluntary payment was not forthcoming, suit was instituted. The defendant has now offered to settle this matter by the payment of $100.00, leaving unpaid the sum of $15.84. In the event this offer is not accepted, the defendant has advised that he will join the contractor as a defendant in the pending suit. In view of the foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deputy Attorney General William J. McCormack, that this claim against Lester J. Kennedy in the sum of $115.84 be cancelled upon the payment of $100.00 rather than incur additional expense in preparing for and trial of this matter. (December 9, 1964)

---

4. The captioned claim covers the cost of repair to a motor vehicle owned by the New Jersey State Highway Department which was damaged on August 9, 1962 as the result of a motor vehicle accident occurring on Route 3, North Bergen, New Jersey. The other vehicle involved in the incident was owned and operated by Betty C. Montgomery. Cost of repair of the damaged Highway vehicle was $92.01. Suit was instituted when voluntary payment was not forthcoming. The defendant has now offered to pay fifty percent of the State's claim leaving unpaid a balance of $46.01. It is possible that recovery in this case will be limited to the above offer in the event the matter were brought to trial since it is possible that contributory negligence on the part of the State would be found by the court. In view of the

(continued)

(contd.) foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deputy Attorney General William J. McCormack, that this claim against Betty C. Montgomery in the amount of $92.01 be cancelled upon the payment of $46.00 rather than incur additional expense in what may be a futile attempt to recover the balance remaining through court proceedings. (December 9, 1964)

S. 52:35. The Committee consists of the Comptroller, Director and Chief Road Engineer, Counsel and State Highway Engineer. (Dec 14, 1964)

Procedures - State Aid

2. Recommendation is made that the Supervising Engineer, State Aid, be authorized to approve Extension of Time Orders and Suspension of Work Orders on all State Aid Projects. Historically, it has been the practice of the Division to submit these papers to the State Highway Commissioner for approval. The reason for this practice is not clear, but seems to be based on the fact that the Commissioner has approved the Supplementary Specifications which provide the means of establishing the completion date. Any change from the official completion date thus established, should, therefore, have the Commissioner's approval. The Statutes do not require approval by the Commissioner of these documents. Extension of Time Orders and Suspension of Work Orders account for an estimated 125 Commission Action Slips a year. This recommendation is concurred in by the Comptroller. (Dec 15, 1964)

NO. 43 - 1964

SCHEDULE OF APPROVALS - DECEMBER 31, 1964

Administration Items

General Property Parcel Map - Route 35, Section 2

1. Approval is recommended of the attached prints of the General Property Parcel Map for Route 35, Section 2, Ocean County, Seaside Heights to Point Pleasant, in order that the necessary duplicate tracings and linen prints may be prepared for filing in Ocean County. (December 29, 1964)

Services - Engineering

2. The Agreement with Grassman, Krey & Mixer dated January 26, 1962 provided for engineering services on the State Teacher's Colleges at Trenton, Paterson & Union. In December 1962, the Department extended this Agreement to include an additional contract for the State Teacher's College at Union. The funds presently provided in this account are not sufficient to cover the cost of the work involved. The first three contracts total approximately $173,000 of construction costs which computes to a fee assignment of approximately $10,400. The fourth contract totals approximately $42,000 of construction costs with approximately $3,600 of fee assignable. The total fee requirement is, therefore, approximately $14,000. Since $11,606.52 is presently provided, additionalfunds are necessary. It is recommended that an additional $2,500 be set up to cover the deficiency. The contract is on a pro rated sliding fee basis of contract award cost. The Department is presently evaluating whether the fee assignable to the Agreement should be computed on an individual basis or as stipulated above. Computation utilizing the alternate possibility produces a fee differential of approximately $3,000. (December 21, 1964)

Agreements-Atlantic City Expressway Authority-Rts. 42,50 & 54

3. All work has been satisfactorily completed on Routes 42, 50 & 54 by the Atlantic City Expressway Authority under the terms of the agreement dated November 4, 1963. Final payment to the Authority is authorized in accordance with the as-built quantities after certification by the Divisions of Roads & Bridges. (December 21, 1964)

Agreements-Tide-Water Pipe Company, Lt.-Route 78, Section 4K

4. Approval and execution is recommended of the attached Agreement between the Tide-Water Pipe Company. Ltd. and the State of New Jersey covering understandings in connection with the relocation of certain facilities of the existing pipeline system which is owned and operated by the Company; to accommodate the construction of Freeway Interstate 78, Section 4K, located in the Township of Bernards, County of Somerset. The State will reimburse the Company for the work it must perform to accommodate the State's construction, which work is estimated at $52,000.00, which includes approximately 10% for contingencies. Construction Program Year 1962-63, Item No. 33. (December 28, 1964.)

Utilities-Public Service Electric & Gas Co., Route 21, Section 5

5. In connection with the construction on Route 21, Section 5, a Change of Plan No. 14 to be approved required the Public Service Electric & Gas Company to temporarily relocate the service to Viking Tool Company and later replace it along an access road to the plant. This work was not included in the original order to the company-Order #2; U-126(17), Contract #3. This extra work is covered by Change Order No. 1 to the Company which totals $6300 and it is recommended that the Public Service Electric & Gas Company be reimbursed in this estimated amount. Construction Program Year 1960-61, Item No. 6. (December 23, 1964)

Claims-Settlement

6. There is presented claim covering the cost of repair to traffic signal equipment which was damaged on September 17, 1963 as the result of a motor vehicle accident occurring on Route 10, Hanover Township, New Jersey. Two vehicles were involved in this accident, one owned by Jean R. Biasi and operated by her employee and another owned and operated by Clayton D. Huff. Cost of repair for the damaged property was $156.39. When voluntary payment was not received, suit was instituted against all parties involved. An offer has now been made in the amount of $125.00, acceptance of which would leave unpaid balance of $31.39. It appears that cost of preparation for and attendance at trial of this matter, would exceed the difference in the amount left owing were the offer to be accepted. In view of the foregoing, it is my recommendation and in accordance with Mr. Levine's memorandum attached hereto and recommendation of Deputy Attorney General William J. McCormack, that this claim against Jean R. Biasi, Antoinette M. Smith and Clayton D. Huff be cancelled upon the payment of $125.00 rather than incur additional expense in attempting to obtain the full amount owed by means of further prosecution of the pending suit. (December 28, 1964)

Utilities NO. 3 - 1965

Agreements-Township of Maple Shade-Route 38, Sections 1F & 2C

7. Agreement dated January 27, 1964, between the State of New Jersey and the Township of Maple Shade, covering understandings in connection with the rearrangement of facilities owned by the Township to accommodate the State's construction of Route 38, Section 1F & 2C set up an amount of $7,400 to cover reimbursement to the Township of Maple Shade. However, the completed and billed cost of this work amounts to $10,220.25, which exceeds the original estimate of $7,400 by 38.1 percent. The causes of the overrun are as follows:

(a) Because firm bottom was found to be lower than anticipated, the quantities of both wet excavation and zone 2 backfill exceeded the estimates.

(b) The contract prices of $1.50/C.Y. for wet excavation and $2.25/C.Y. for zone 2 refill are each slightly in excess of the unit prices used in preparing the estimate.

It is, therefore, recommended that an additional amount of $2,820.25 be set up to cover the additional cost of work performed under the above mentioned Agreement. Construction Program Year 1961-1962, Item Number 14. (Jan 25, 1965)

Rt. 280, Sec. 6E

Utilities-Agreements-Board of Water Commissioners, City of E. Orange,

8. The Board of Water Commissioners is to be reimbursed for the actual cost of relocating their facilities, which including 10 percent for contingencies is estimated at $68,000.00. Construction Program Year 1963-1964, Item Number 20. (Jan 25, 1965)

Utilities

Agreements-Colonial Pipeline Company-Route 295, Section 2J

9. It is recommended that an additional amount of $1,521.08 be set up to cover the cost of Change Order #1 to Utility Agreement, PUA-41-295-2J, Freeway Interstate Route 295, Sec. 2J, dated October 9, 1964, with the Colonial Pipeline Company. This increase of $1,521.08 is explained by the fact that wet excavation and zone 2 backfill were more extensive as constructed than as originally estimated. Zone 2 backfill amounted to 761 C.Y. as constructed, compared to 190 C.Y. as originally estimated. The additional excavation and backfill was considered by pipeline engineers and State engineers as being necessary for this project, and the work so performed under the pipeline contract will result in a reduction of this same work in the proposed road contract. Construction Program Year 1963-1964, Item Number 23. (Jan 27, 1965)

Claims-Settlement

6. Senior Highway Engineering Oliver G. Carson, sustained fatal injuries arising out of an accident occurring on July 30, 1962 involving a vehicle owned by the contractor, M.J. Stavola, Inc., being operated at the time by Grady E. Buffaloe, an employee of M.J. Stavola, Inc. The accident occurred when the contractor's vehicle was backing up with a load of asphalt for the black top paver. Mr. Carson at the time was walking toward the paver with his back to the truck and was struck by the rear of the truck resulting in fatal injuries. The Highway Department by reason

(cont'd)

ofthis accident was required to pay the widow the sum of $14,000.00 which is a statutory figure covering death claims. The widow, Hannah M. Carson, instituted a suit against the contractor and his employee which was recently reached for a pre-trial conference before Judge Barlow. At the settlement conference it was determined that there were no witnesses to the accident with the exception of James Stavola who according to his statement made every effort by waving his hands and yelling to alert Mr. Carson who appraarently did not hear his warning. The Judge during the conference indicated that he felt there was a real question of contributory negligence involving this case. The insurance carrier for the contractor also shares the Judge's opinion for they indicated that they did not feel the case had a value which would pay the compensation lieu in full. It was pointed out that the employee at the time of the occurrence was 69 years old. Subsequent negotiations between the widow's attorney and the insurance carrier has resulted in a top figure of $11,000. which offer is contingent upon the State compromising its compensation lien. It has been proposed that the State accept $5,000 net in full settlement of its lien and the balance would be turned over to the widow after deducting her attorney's fees of 33 1/3%. In the event we received the full amount of $11,000. which would be subject to statutory contribution toward consel fees and expenses of suit, we would receive the net figure of $7,133.34, in which case the widow would receive nothing. In view of the foregoing and giving due consideration to the possible adverse decision in the event of trial, we feel the proposed offer of settlement is reasonable, and it is our recommendation and in accordance with Mr. Levine's memorandum attached hereto and the recommendation of Deputy Attorney General William J. McCormack that it receive favorable consideration and approval. (February 9, 1965)
